ABOUT ME

Hi there! Let me introduce myself. My name is Imam Wahyudi, and I am currently an active student in my eighth semester of the Faculty of Science and Technology, majoring in Electrical Engineering at Al-Azhar Indonesia University (UAI).

Throughout my college years, I have developed a strong interest in digitalization sciences, such as digital circuits, digital telecommunications, and digital controls. In addition to my academic pursuits, I have also completed a Certified Internship program for the "Red and White Laptop Development" as a Hardware Engineer.

Aside from my academic and professional pursuits, I am an active participant in various campus activities and organizations, which has helped me to develop my soft skills, such as communication and time management. Furthermore, as an avid reader, I enjoy exploring new topics and technologies.

I believe that my passion for learning, combined with the experiences that I have gained so far, will be a valuable asset in contributing to and benefiting from the 'Hyundai Motor Global Internship Program 2023'.

EDUCATION

• Universitas Al-Azhar Indonesia

Teknik Elektro (GPA: 3,01 out of 4.00)
2019 -

INTERNSHIP EXPERIENCE

MSIB at PT Prasimax Inovasi Teknologi (August 2022 - December 2022)
Hardware Engineer "Pengembangan Laptop Merah Putih"

- Schematic and PCB Design
- HMI (Human Machine Interface) Design

CONFERENCE

• COMMUNITY EMPOWERMENT NATIONAL SEMINAR 2022, Al-Azhar University

"Implementation of Solar Power Plant Installation at Rumah
Gemilang Indonesia"

SKILLS

- Python Language
- Assembly Language
- Verilog/VHDL Language
- C & C++ Language
- Matlab
- Arduino IDE
- Schematic and PCB Design Electronic Circuit
- HMI Design (Human Machine Interface)
- Microsoft Office
